6. Systems of Care

This graphic of the UK state care system was produced for the Explorers Project exhibition and workshops at Autograph ABP in London in November 2017. It explains the very complex relationships of care and support provided by various bodies that represent the State, that can exist for individuals with complex needs. These relationships need to be negotiated usually by the family and/or advocate or guardian of an individual, sometimes (but not always) with the support of a social worker.

THE STATE – SYSTEMS OF (POTENTIAL) SUPPORT FOR PEOPLE WITH COMPLEX NEEDS
